Department of Primary Industries.  
GPO. 4440,  
Melbourne. Vic. 3000.

Dear Sir,

I write to voice my anger re introducing GM canola (anything ) in to Victoria.

The cost to our community will be enormous, to our Hospital/Health system.

The allergies caused directly from GM foods is scary to say the least.

We cannot allow these products to be released into our environment. I as a wife and mother do not want my family to eat these unknown foods ever.

As well as my family having to eat this stuff so will all your families.

Hospital and Doctor visits will become the norm.

Our Hospitals, Public and Private can not cope with what is thrown at them at the present moment.

You can double that and triple that if GM foods are introduced.

Our community **CAN NOT** afford this.

Do Not believe the lies from the companies such as Monsanto or Bayer they are not interested in YOUR or YOUR families health, just as they don't care about mine or any other Australian's health.

I ask that a moratorium of 10 to 15 years, so as these companies can know and understand what they are doing is dangerous.

If we do not release any GM foods into our State or Country our economy will BOOM, as no Country has ever rejected NON GM Food. Many countries HAVE rejected GM food.

Please take time to read attached pages of information.

Yours faithfully,

Genna Charylo.
