Dear DPI,

It is my firm belief that GM Canola and other GM crops, pose a significant threat to the Organic and Biodynamic Production Industry, and therefore, GM crops should not allowed to be grown in Victoria. The burden of proof is on the suppliers of GM products, to prove that their products will not spread beyond the fences of the farms they are grown on. This has never been proved, and until it is proven, GM crops need to have a moratorium on them.

Best Regards,

Tom Duncan
