Subject GM crop ban review

I support the extension of GM crop bans until we know more about what such technology may be doing to our health and the health of the environment. There have been many studies throughout the world that have shown problems in laboratory animals fed GM-produced foodstuffs. There have also been many problems in areas where GM crops have been grown, including contamination of non-GM crops, resistance, weed escape, detrimental economics for farmers, terminator seed and so forth.

Thank you for the opportunity to express my concerns.

Sue Bond MBBS, BA, MA
