Submission 151

RECEIVED
ROUND

Dear Submissions Review Panel,

As a chef & consumer of foodstuffs from primary industry I would like to voice my opinion in the GM debate. Firstly, current consumer preference is leaning toward organics and away from processing, chemical treatment & genetic modification in my field. On a personal level, I would not feed my children genetically modified food after reading what has already occurred in the USA & Canada. Contamination of our food crops with GM strains, I am convinced, ①

would be a mistake as huge as the introduction of cane toads or rabbits. I urge you to look to the future and not at short-term financial benefits. I say No to GM crops + lifting the moratorium on GM food crops in Victoria. I know that many, if not all of my colleagues, friends and fellow parents share my view.

yours Sincerely.

RUTH KENRICK-SMITH
