To Whom it may concern,

I am writing to express my objection to the approval of Genetically Modified Canola crops within the state of Victoria. There is insufficient long term testing on the health and environmental risks that may be created by GM food. The potential for contamination and widespread devastation of non-GM crops is incredibly high. As such, I feel that until such time when extensive testing has been carried out GM crops should not be permitted in Victoria.

Regards,
Joshua Studd
