

Orbost Agricultural Chemical Control Area (ACCA)

Description of Area
The Orbost Agricultural Chemical Control Area is all that area within the Shire of East Gippsland commencing 2 km on either side of the Snowy River from its junction with Stony Creek at Bete Bolong south-westerly to the junction with Griebonow's Road at Newmerella.

The Orbost Agricultural Chemical Control Area is operational all year.

Use of the chemicals listed below is prohibited within the Agricultural Chemical Control Area by the application of:

- any formulation of picloram, sulfometuron methyl, esters of triclopyr, and formulations of hexazinone when applied as a liquid. (These chemicals are prohibited only when applied by aerial application or by mister).
- the ester formulations of MCPA; 2,4-D or 2,4-DB. (These chemicals are prohibited by any method of application).

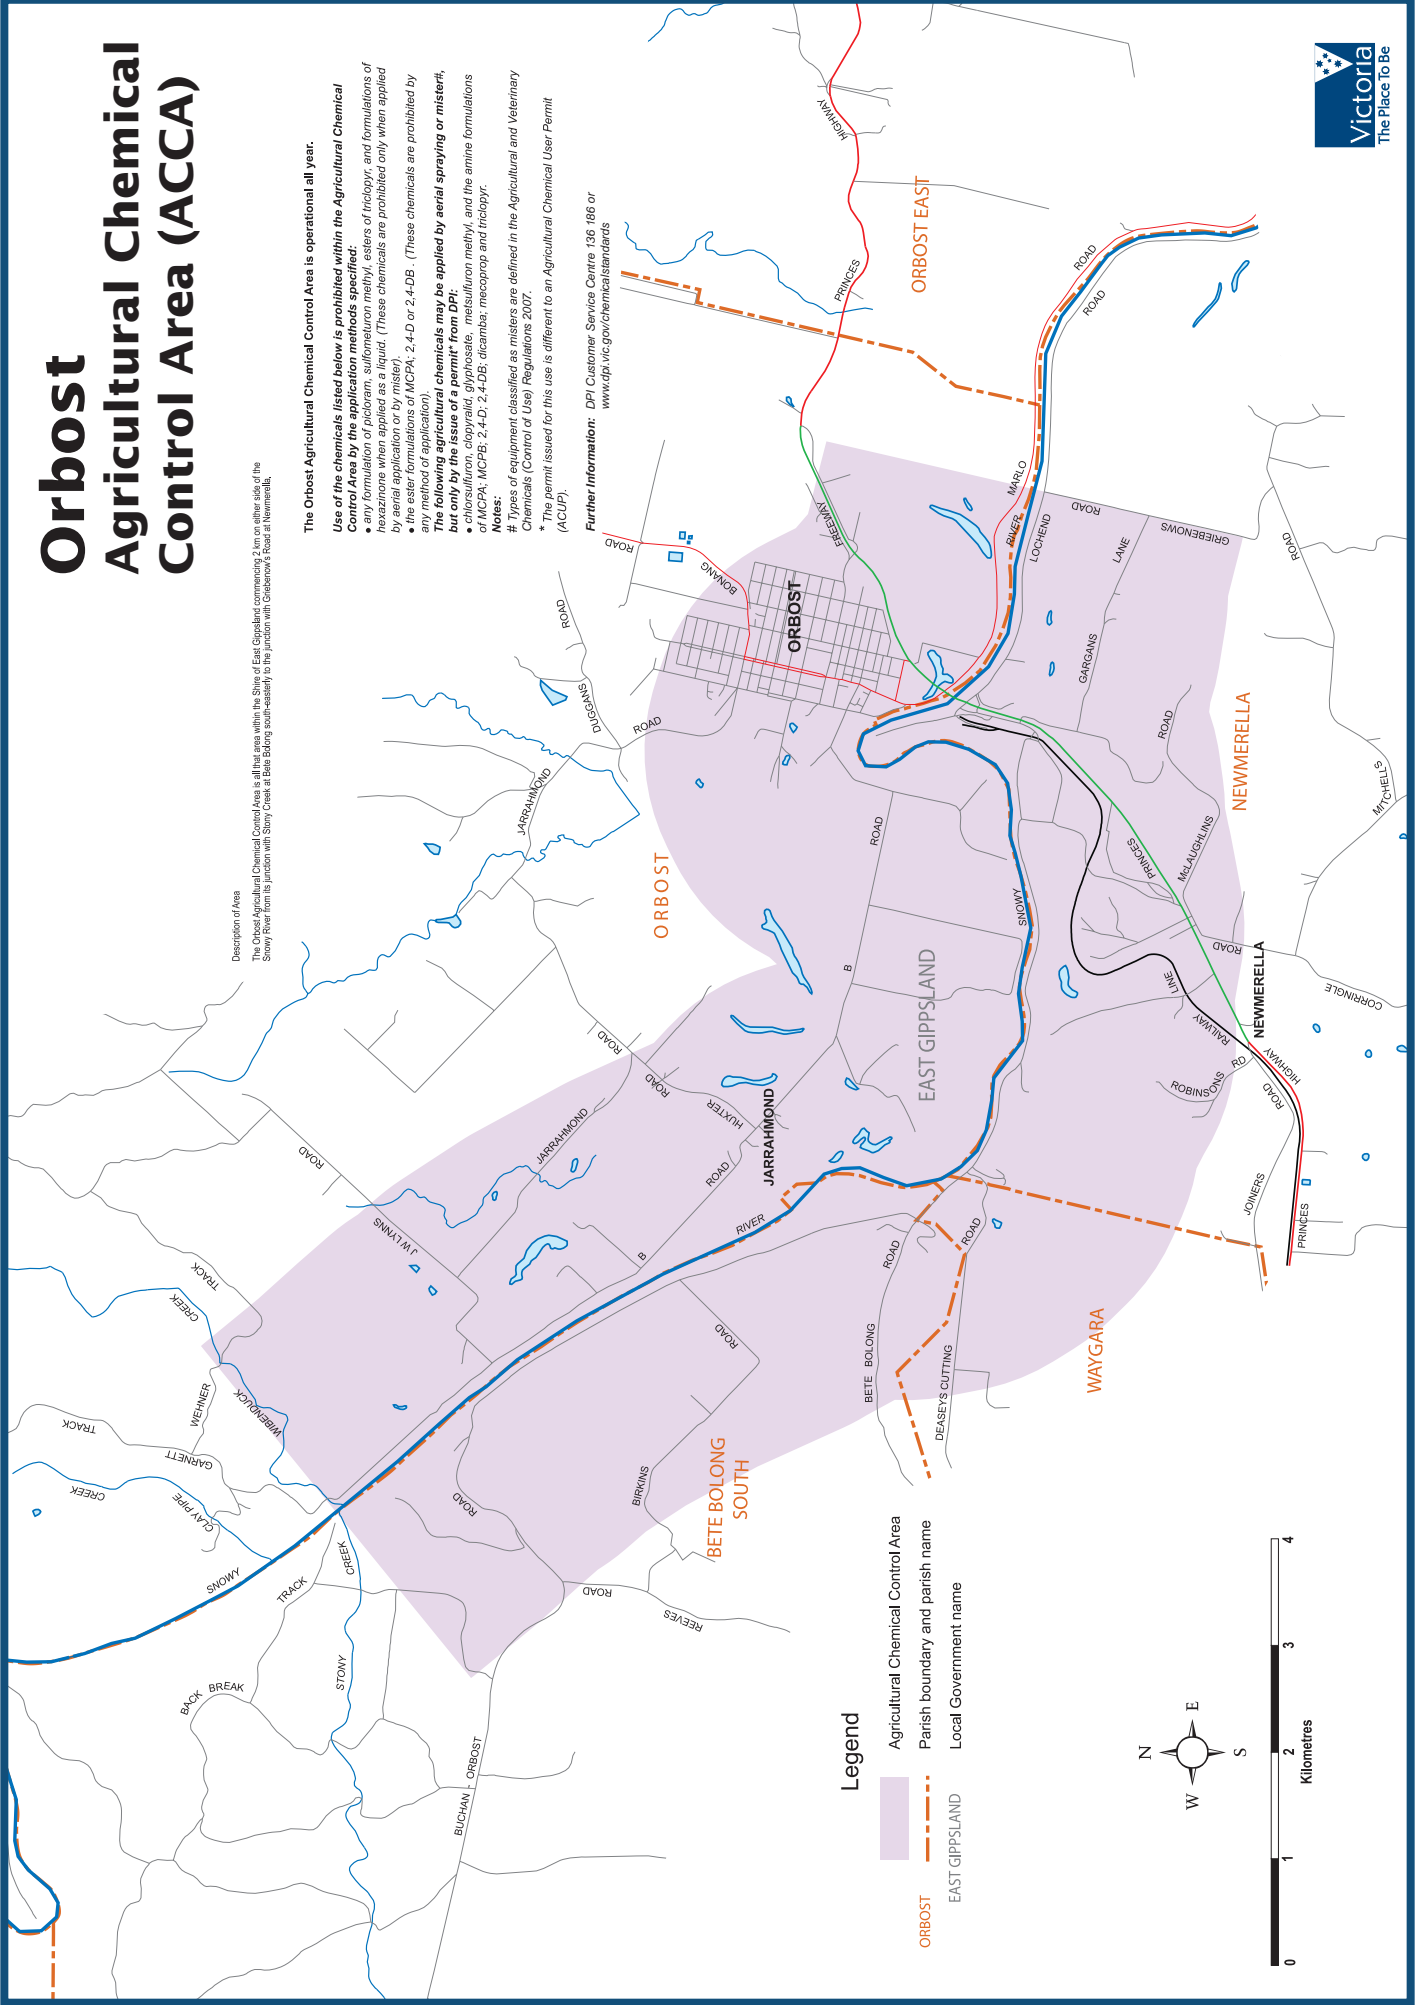

The following agricultural chemicals may be applied by aerial spraying or mister, but only by the issue of a permit from DPI:

- chloresuluron, eptopyralid, glifosinate, metsulfuron methyl, and the amine formulations of MCPA, MCPB, 2,4-D, 2,4-DB, dicamba, mecoprop and triclopyr.

Notes:
Types of equipment classified as misters are defined in the Agricultural and Veterinary Chemicals (Control of Use) Regulations 2007.

* This permit issued for this use is different to an Agricultural Chemical User Permit (ACUP).
