

# PROGRAZE®

**HELPING YOU TO DEVELOP A GRAZING SYSTEM FOR YOUR FARM THAT IS MORE PRODUCTIVE, MORE PROFITABLE AND MORE SUSTAINABLE**

Juggling the resources involved in grazing production is a challenging task. While you want to achieve the best possible productivity from your enterprise, you also want to ensure that today's high achievements don't compromise tomorrow's returns.

The MLA EDGEnetwork® PROGRAZE workshop will help you manage your resources better. Prograze will show you how to:

- ★ Assess animal and pasture productivity
- ★ Set production targets
- ★ Budget feed to reach your targets
- ★ Monitor pasture quantity and quality

The 7 session workshop demonstrates how to integrate management activities, make the most of resources and increase sustainability of your farming system.

## WHY THE WORKSHOP WILL BE VALUABLE TO YOU

Efficient conversion of pasture to animal products that meet market specifications is an important target. To achieve this, you must start with a production system capable of maintaining pasture quality and productivity. Attending a PROGRAZE workshop can provide you with daily decision making tools to achieve this.

## WHAT YOU WILL GAIN FROM THE WORKSHOP

Each session is run on a participant's farm, ensuring practical and applicable outcomes. The presenters are a team who are experienced with on-farm issues. They have the ability to relate to your own situation and achieve outcomes for your business in an interesting and enjoyable format.

The competencies addressed during this workshop are from the Rural Production Training Package and are as follows:

- RTE4011A Manage pastures for livestock production
- RTE4913A Analyse and interpret production data

**Course commencing on  
22<sup>nd</sup> May 2009**

**2009 Prices: \$350 or \$105 for  
concession card holders**
