

GREG BEESTON

Greg Beeston is a graduate of the University of Queensland in botanical ecology. After working for the Queensland and Victorian governments in the fields of ecology, land use mapping and regional planning he moved to Western Australia in 1985. In 1986 he began the establishment of the spatial data system in the then Department of Agriculture and has managed that unit under various names since then. He is currently the Principal Research Officer in Geographic Information Systems for the Department of Agriculture and Food Western Australia.

His research interests lie in the areas of land use mapping and planning as well as vegetation information systems for use in natural resource management and planning.
