

CHARLIE HAWKINS

Charlie Hawkins has over 15 years background in spatial information systems and natural resource management. After completing a Bachelor of Geography at Monash Univeristy, I moved to the USA to complete an MS in Forestry and Geomatics from Colorado State University. The last ten years have focussed on developing commercial remote sensing sensors and mapping products between Space Imaging in Colorado and BAE in Hawaii. The last two years have been consumed with modelling growth, carbon sequestration and related environmental services with Ensis and the Commercial Environmental Forestry Team with Dr. Phil Polglase. Currently undertaking project work and developing new modelling and remote sensing based products for Ensis.
