

**Dr. ROBERT LESSLIE**

Rob is a Principal Scientist in the Land Management Sciences Programme, Bureau of Rural Sciences. He is a geographer and ecologist with more than 25 years experience in natural resources evaluation and management in the government, education and private sectors. In his present position Rob manages the Australian Collaborative Land Use Mapping Program, a partnership of State and Australian government agencies coordinating the production of land use and land management practices information for Australia. Rob also contributes to Bureau work in natural resources analysis and assessment, including the development of spatial analytical tools to assist in decision-making and policy development.
