

## **Dr. PETER VESK**

Peter Vesk is a Lecturer in Plant Ecology with the School of Botany, the University of Melbourne. After undergrad and MSc work at the Univ. of Sydney and PhD work with Mark Westoby at Macquarie University, Peter did a postdoc with Ralph Mac Nally at Monash University. Current research focuses on modelling vegetation dynamics under revegetation and land use change scenarios and the flow-on effects on biota. He has published research on a number of topics including plant ecological strategies, grazing effects on vegetation, resprouting after fire, drought damage and recovery in plants, mycorrhizas, and biomonitoring and metal uptake in aquatic organisms.
