

Dr IAN MANSERGH

Ian Mansergh's early career was in wildlife research and evolved to biodiversity science and policy and land-use. More recently he has been involved with the Greenhouse Policy Unit with the Department of Sustainability and Environment. Dr. Mansergh has experience ranging from detailed ecological research on threatened species (eg Mountain Pygmy-possum), land management in alps and forests, and strategy development related to biodiversity at the state (Victoria's Biodiversity) and national levels.

Dr. Mansergh has published around 70 scientific articles covering topics ranging from zoology, koori words, ecology, resource use, and the impacts of climate change. Dr. Mansergh is a member of several independent expert scientific committees. He is currently interested in land and water use change and biodiversity in the context of climate change.
